

CRYSTAL-FACE Publications

- No special issue
- Clusters of papers on closely related issues
 - leaders for paper clusters will be identified
 - top-down harassment
- Paper submission within 18 months of EOM

1st step: submission of titles to Kathy Thompson via email or form
password-protected list of titles will be maintained on the
CRYSTAL web page

Organic films on ferro–nickel–chrome aerosols:

Part 1: Kinetic limitations

Part 2: Satellite validation

Estimated VOC emissions from incomplete constitutional oxidation
above Rankine 911*

The forces that shape our world (a NATO two–part series):

Volume I: A subatomic mechanism for reduction of surface roughness
in the subtropical desert

Volume II: Mitigation of global warming through convective dehydration:
A source of mineral dust to the stratospheric overworld

UAV measurements above the fundopause:

Vertical profiles and nocturnal emissions

*Rankine 911 = Fahrenheit 451
